ISSN Online: 0976-6375

AIM AND SCOPE

International Journal of Computer Engineering and Technology (IJCET) employs a paperless, electronic submission and evaluation system to promote a rapid turnaround in the peer review process. IJCET is an open access refereed journal that publishes articles which contribute new results in selected areas of the computer engineering and technology.

The journal welcomes publications of high-quality papers on theoretical developments and practical applications in computer science and engineering. Original research papers, state-of-the-art reviews, and high-quality technical notes are invited for publications.

The journal also seeks clearly written survey and review articles from experts in the field, to promote insightful understanding of the state-of-the-art and application trends.

Papers for publication in the IJCET are selected through rigorous peer review to ensure originality, timeliness, relevance, and readability.

JOURNAL DESCRIPTION

International Journal of Computer Engineering and Technology (IJCET) is an international journal dedicated to the latest advancements in Computer and Information Technology. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of Computer Engineering and Information Technology.

SUBJECT AREA

The topics to be covered by this journal include but are not limited to the following fields:

- Applications of Communication Systems
- Artificial Intelligence
- Big Data Search and Mining
- Cloud Computing
- Communication Protocols
- Complex Network Models
- Computational Robotics
- Computer and Network Security
- Computer Graphics and Visualization
- Computer Vision
- Cooperative Communications
- Distributed Computing
- Green Networking
- Grid Computing
- High Performance Computing
- Image Processing
- Information and Communication Theory and Algorithms
- Information and Communication
- Security Privacy and Trust
- Information Retrieval
- Mobile and Portable Communications Systems
- Mobile and Ubiquitous Networks
- Mobile Computing Systems
- Database Management System
- Multimedia/Signal Processing
- Network Modelling and Simulation
- Numerical Methods
- Online Social Network Computing
- Optical Communications
- Self-Stabilization
- Autonomic Computing
- Simulation/Analytical Evaluation of Communication Systems
