## Processing Charges

IAEME Publication Journals are Open Access journal accessible for free on the Internet. IAEME Publication, we guarantee that no university library or individual reader will ever have to buy a subscription or pay any payperview fees to access articles in the electronic version of the journal. There is hence no revenue at IAEME Publication neither from the sale of subscriptions to the electronic version of the journal nor from payperview fees. Yet, the online publication process does involve costs including those pertaining to setup and maintenance of the publication infrastructure, website maintenance and routine operation of the journal, processing of manuscripts through peerreviews, editing, publishing, maintaining the scholarly record, and archiving. To cover these costs, the journal depends on Article Process Charges (henceforth: APC), also called Publication Fees. APC are due when a manuscript has been accepted for publication.

All IAEME Publication Journals are open access Journal. Open access allows all interested readers to view, download, print, and redistribute any article without a subscription, enabling far greater distribution of an author's work than the traditional subscription-based publishing model. In Open access Publication, Paper Processing Charges replace subscription charges and allow publishers to make the fulltext of every published article freely available to all interested readers.

Publishing an article in IAEME Publication Journals requires Article Processing Charges that will be paid by the submitting author upon acceptance of the article for publication.

IAEME Publication does not request Article Submission Charges, also called Submission Fees. These are due at the time of submission of the manuscript. Nor does IAEME Publication charge per page or for colour figures or for any other items for which other publishers are known to charge.

Please note that IAEME Publication regular APC are well below average. All the while, IAEME Publication never ceases to seek to improve the quality guaranteed to its authors and its readers in all kinds of ways, including 1) Indexing the journal and article in many indexing search engines such as Scopedatabase.com, Google Scholar, etc 2) generating article level metrics, 3) generating journal metrics, e.g., by calculating a Journal Impact Factor (JIF), and 3) archiving all articles at Database. Authors should also keep in mind the cost effectiveness, or value for money, of publishing Open Access. IAEME Publication thinks it would score well on cost effectiveness. But more research needs to be done on the matter.

## Sources for Article Processing Charges

Authors of an article are responsible for arranging the payment of APC. Still, that typically does not mean that authors end up paying for the publication of the article. The cost of APC is very often assumed either by the organization funding the research published in the article, or by an Open Access Publishing Fund, or by the institution at which the author is employed.

## Fair Dealing Authors and Publisher

When an author submits a manuscript for review at one of IAEME Publication journals, the submitted manuscript should not have been previously published in any form and must not be currently under consideration for publication elsewhere. The manuscript should also not be submitted to any other journal during the review process at IAEME Publication. In case the review process at IAEME Publication takes much longer than stated and the author wishes to end the review process at IAEME Publication, he/she should get in contact with the editor of the journal at IAEME Publication and come to an agreement suitable for both sides after looking at the stage of the manuscript in the review process.

With the APC specified above, the author is given an indication what the APC will be. IAEME Publication is charging Publication Fees (APC) but not Submission Fees. This is to the benefit to authors because payments are only due once the author knows the manuscript is accepted. IAEME Publication with editors and reviewers puts much effort in dealing with the manuscript and expects the authors to stick to the common plan of publishing the paper which is linked to payments of APC as given above at the end of the review process. The author is not legally bound at this time, but it would be seen as a strong breach of academic conduct to back off from the publication process. Once the manuscript is accepted for publication, IAEME Publication will issue an invoice in the Paper Submission. This is IAEME Publication legal offer and will state the regular APC of the journal or the reduced APC. The Corresponding Author is expected to arrange payments of the amount stated at this time.

### Refund Policy

Once an article has been accepted for publication, any Article Processing Charges on the article become due. The submitting author accepts responsibility for the Article Processing Charges, and IAEME Publication will not issue refunds of any kind except those payments made by mistake or in excess of the amount required
